

Twin-Flex Plus Two-Wire Fire Devices

To compliment the Twin-Flex range and to ensure the system is even more installer friendly, we supply this extensive series of two-wire devices.

The Multi-Point detector is the key to this two-wire system and offers seven different modes of detection and a sounder in one device. The mode of detection required is changed simply by configuring the DIL switch in the detector's electronics module. The Multi-Point detector can be supplied with or without an integral 90dBA sounder.

Compact and easy to install, the Multi-Point detector is fully compliant with all European detector type specifications and is suitable for installations compliant with BS5839:Part 1:1988.

The call point is resettable and is available with a 90dBA integral sounder making it the ideal solution for manual systems.

Our range of high output sounders have been developed to give the installer added flexibility. A combined sounder strobe is available providing both visual and audible indications.

The two-wire fire output module can be situated anywhere on the zone circuit and is ideal for connecting to plant shutdown and door release mechanisms. The two-wire repeater panel uses key access and has silence, sound alarms and reset facilities.

Features

Multi-Point Detector

- Three smoke detection modes/Three heat detection modes
- Modes can be changed before and after installation
- Available with or without an integral 90dBA sounder
- Intelligent detector - Microprocessor controlled
- Continuous self-calibration
- Disposable optical chamber (Can be economically replaced)
- Fully encapsulated electronics
- Compact and easy to install

Repeater Panel

- 8 or 16 zone variations available
- Key access

- Silence, sound alarm and reset facilities
- Can replicate major user controls on the control panel

Sounders/Strobes

- 4 tone settings
- Anti-tamper feature
- Low current consumption
- Bayonet locking device

Call Points

- Fitted with a LED as standard
- 20mm entries as standard
- Resettable element
- Immediate full alarm when fire is detected in communal areas
- Eliminates the disruption of nuisance alarms
- The perfect solution for BS5839 Part 6 (HMO's)
